

# Think Ink™ IMS

4" Print Configuration w/  
1000ml Ink Delivery Unit

- Low Ink Alert (strobe light)
- Large Ink Reservoir
- Portable – “Move the ink, not the job”
- Frees up operators to do quality control
- Can be adapted to fit most inkjet machines
- Less Waste

8" Print Configuration w/  
2000ml Ink Delivery Unit

## Save money and time with the Think Ink IMS Continuous Ink Supply!

The Think Ink Industrial Manifold System (IMS) is designed for high volume HP ink users to reduce ink cost and increase head life. The Think Ink IMS continuous ink supply is a simple and reliable gravity fed system that is easy to use. Unlike regular HP cartridges, the IMS cartridges have connectors that allow HP ink to fill the heads while in use. An IMS cartridge can last between 175 to 1000ml of ink depending on the formula. A regular HP disposable cartridge has 42ml of usable ink.

IMS Supply 350ml

IMS Printhead w/Connector

Once an IMS is purchased, the only supplies that need to be ordered are the IMS supply and IMS Printhead. The Ink Delivery Unit can hold up to 2000ml of ink, which is equal to approximately 47 ink cartridges.

1000ml Ink Delivery Unit

An IMS unit is available in configurations from 2-10 inches of print. Each Ink Delivery Unit and Regulator supports one type of ink.

8" Regulator

**Works on: Accufast • Astro • Bryce • Busko • DataPac • Kirk Rudy • MCS • Pitney Bowes  
Prism • Rena • Videojet • Winkjet**

**Save 10-50% over cartridge cost!**
